

APPLICATION CHECKLIST

Located within the nationally recognized Sanders-Brown Center on Aging, TRIAD is a paid program for predocs and postdocs to gain specialized, in-depth research training and professional skills to advance their scientific careers.

Eligibility

Predoctoral:

Successfully completed qualifying exam.

Typically, predoctoral applicants are enrolled in the University of Kentucky's Integrated Biomedical Sciences graduate program or the MD/PhD program. Qualified applicants from other programs may email Sanders-Brown Training to inquire.

Postdoctoral:

Completed a PhD in a relevant field.

Successfully defended dissertation prior to the employment start date.

Postdoctoral applicants should have completed a PhD in a relevant field, which includes most areas within the biomedical and behavioral sciences. Learn more about "[Why AD Research](#)".

Applicants who have successfully defended their dissertation prior to the employment start date, but have not yet had their degree formally conferred, are also eligible.

All Applicants:

United States citizen or permanent resident.

While we welcome all qualified individuals, please note that this training program is only open to United States citizens and permanent residents.

Required Documents

All Applicants:

Application prepared in consultation with primary mentor.

Letters of Recommendation (2) sent separately to SandersBrownTraining@uky.edu.

Submit these three items as a single PDF titled "LastName_Proposal.pdf".

1. Cover Letter

Postdocs should explain in their cover letter how their degree or training relates to Alzheimer's disease research if it's not readily apparent from their resume.

2. Research Proposal

Includes these sections:

Research Plan: up to ~2500 words, excluding references and figures. Plans that exceed this requirement will not be considered. The expectation is that this document will be similar to the NIH Research strategy component of a F-series fellowship application.

Career Goals Summary: one page of how the research project relates to the applicant's career goals and to advancing the field of Alzheimer's disease, related dementias, and dementia risk factors.

Mentor Biosketch

Mentor Letter of Support

3. Resume, CV, or Biosketch
