HELP ONLINE MODIFYING THE ENVIRONMENT

For more information about participating,
scan the QR code, or visit: bit.ly/3NDMUrd

A research study for adults with memory loss and dementia living at home in rural Kentucky with caregivers.

This study will provide one-on-one support and training to care partners through telehealth in order to improve functional behaviors in the home environment for the person with dementia. If you are caring for and living with someone who has Alzheimer's disease or other dementias with challenging behaviors, you may be able to participate.

PARTICIPATION INCLUDES:

- ✓ 8 weekly meetings with a specialist in dementia caregiving
- ✓ Training in behavior tracking
- ✓ Review and/or receipt of home modifying supplies

If interested in participating Contact:
