

With mild **Alzheimer's**,
your mind isn't fully connected to your
memory, thoughts, and behavior.

Learn about the **ABROAD research study** of an investigational drug for adults who have been diagnosed with mild Alzheimer's disease or are experiencing signs and symptoms of Alzheimer's.

To pre-qualify for this study, you must:

- Be 50 to 90 years of age
- Have been diagnosed with mild Alzheimer's OR have been experiencing signs and symptoms of Alzheimer's such as:
 - Trouble retaining new information
 - Frequently misplacing objects
 - Forgetting to pay bills
 - Difficulty paying attention
 - Forgetting appointments
- Have a study partner who spends an average of 10 hours per week with you

Additional criteria will apply. All study-related medical care, visits, tests, and study drug will be provided at no cost. You may also be compensated for your time and travel.
