Nanobody Library			

Name of protein or code name	

I certify that I am submitting a purified protein or protein complex that is nontoxic and not contaminated with live bacteria or viruses.

Please submit a picture of an SDS-PAGE gel of your protein with this nanobody request form.

There are certain detergents that are not compatible with injection into alpacas. If your protein requires a detergent let us know which detergent and at what concentration.

At this time we require an additional charge for GST and MBP fusion proteins. Please inquire.
