

ARE YOU OR YOUR LOVED ONE LIVING WITH DEMENTIA WITH LEWY BODIES (DLB)?

Cognition Therapeutics is conducting a Phase 2 research study on a potential new treatment for Dementia with Lewy Bodies and are looking for qualified participants.

Together we can **light the way** for Dementia with Lewy Bodies research

ELIGIBLE PARTICIPANTS

A qualified participant must:

- Be between the ages of 50 to 85
- Have been diagnosed with mild to moderate Dementia with Lewy Bodies (DLB)
- Have a caregiver or study partner who is willing and able to attend all study visits and participate in some study assessments
- Have not had a stroke or transient ischemic attack (TIA) within the past 12 months

*There are additional study requirements to participate.
A SHIMMER study representative will discuss them with you.*

Enrolled participants in the study will receive:

- Study-related care, tests, and assessments from a local doctor cost-free
- The ability to help advance research for Dementia with Lewy Bodies treatment
- Compensation for participation

Health insurance is not required to participate.

Are you ready to **light the way** for Dementia with Lewy Bodies research?
