

## Climate & Health in Kentucky: Exploring K-12 Curriculum Connections

A virtual professional development workshop for K-12 teachers

**Tuesday, August 22, 2023**

**4:00-6:00 pm ET, virtual**

This **free, interactive** workshop will help answer questions such as:

- *What does climate change look like in Kentucky?*
- *How does climate influence human health?*
- *What can we do about it?*
- *What opportunities exist for incorporating climate and health content into classroom instruction?*

*Presenters include:*

*Dana Haine, MS, Science Educator, Center for Environmental Health and Susceptibility, University of North Carolina at Chapel Hill*

*Stacy Stanifer, PhD, Nursing & Environmental Health, University of Kentucky*

*Alice Turkington, PhD, Geography, University of Kentucky*

*Craig Wilmhoff, MS, High School Biology Teacher, Perry County Public Schools System*

The workshop is hosted by the University of Kentucky's Center For Appalachian Research in Environmental Sciences ([UK-CARES](#)) and is designed by and for educators. All Kentucky teachers (K-12) are welcome. The workshop content aligns with the Next Generation Science Standards. Register soon, space is limited. Attendees will receive confirmation of two hours of professional development upon completion of an online evaluation.

Registration closes **August 18, 2023**.
